# ABOUT PRIMO RECYCLING

Primo Recycling is a new dynamic and environmentally friendly recycling company.

We focus primarily on the recycling of Ferrous (iron and steel) and Non-Ferrous metals (aluminium, copper, stainless steel, lead, nickel, brass, tin and bronze).

We constantly strive to improve on our excellent customer and supplier services offering a quick and professional service that also includes hassle free payments for all our suppliers.

We have implemented market leading technology and seamless payment processes to service all our suppliers.

Our goal is to become the first in mind destination of the Ferrous and Non-Ferrous metal industry for all our valued clients.

Our services alone provide us with an exciting opportunity to make our mark on the world recycling and environmental map.

Primo Recycling collects all forms of Ferrous and Non-Ferrous metals, including iron, steel, copper, stainless steel and many more.

We collect and receive Ferrous and Non-Ferrous metals that are weighed in on our calibrated SABS approved Weigh Bridge.

We use a Lariat system to remain compliant with the Second-Hand Goods Act and ensure that all the products received are only from properly registered and compliant suppliers.

We ensure that we do not purchase any stolen goods and we always double check the origin of suspicious materials received before we purchase them.

Customers can relax with a beverage while we take care in offloading their commodity and weighing it on our calibrated small scales. Making sure the client gets the best treatment while at Primo Recycling.

# USED BATTERY PROCESSING

Being an environmentally friendly company, we strive each and every day to prioritise the environment.

We are dedicated to re-purpose used automotive and industrial batteries. This is one of our many contributions to creating a prosperous environment.

We receive and collect used and damaged lead acid batteries for our clients, as well as properly treating the acid and reusing the lead within the batteries. Our treatment and transporting of all the batteries are always with the environment in mind.

Primo Recycling is also well-known for our exportation of automotive batteries to a varied range of International smelters.

We have equipped ourselves with the DEA and ITAC permits that allow us to export overseas.

We also make sure our pallets are packed and transported according to the acknowledged international transport standards.

The processing for all scrap batteries is performed at the registered Waste Management Branch in Benoni.

Even when the dark times of load shedding happen, Primo Recycling is still open and functions with an installed generator on site.

We at Primo Recycling make sure our clients feel secure. Protection for our clients is of the outmost importance and we make sure that our work environment is free from Covid-19. We sanitize our workers, clients and workplace. Masks are worn at all times so that we can protect all that comes into Primo Recycling.
